

SAVANT PROTECTION CEO TO SPEAK AT AGC'S 6TH ANNUAL INFORMATION SECURITY & WEST COAST EMERGING GROWTH CONFERENCE ON APPLICATION WHITELISTING

Security Industry Veteran Paul Paget to Discuss How Application Whitelisting is Being Used to Stop Malware Attacks

February 15, 2010 – Hudson, NH – Savant Protection, the leading provider of Automated Application Whitelisting, today announced that CEO and security industry veteran Paul Paget will speak on Application Whitelisting at America's Growth Capital's (AGC) 6th Annual Information Security and West Coast Emerging Growth Conference being held in San Francisco on March 1-2, 2010.

The two-day AGC event includes addresses by industry leaders, panel discussions, and company presentations. The 600+ attendees will have the opportunity to hear discussions focused on the most relevant topics of the day. They also will hear from companies, such as Savant Protection, in emerging growth areas including software, services, clean tech, digital media/internet, data center, robotics and FinTech.

What: Savant presentation on the benefits of Automated Application Whitelisting

When: Monday, March 1

Where: Westin San Francisco, San Francisco, California

"With increasing attacks, including the recent Internet Explorer (IE) zero-day attacks, stopping malware, be it a malicious Trojan or unauthorized executable, is the prime objective of application whitelisting," said Mr. Paget. "However, not all application whitelisting technologies are equal. I look forward to discussing what to consider when looking at this technology and to relaying the security and compliance benefits organizations are gaining from implementing it. "

About Paul Paget:

Paul Paget is the CEO of Savant Protection. Mr. Paget is a network security industry veteran with a proven track record of building security software companies. Throughout his 30-year career, Mr. Paget has distinguished himself as a strategic leader who has demonstrated success in launching and growing new ventures and accelerating growth in established companies.

Prior to Savant Protection, Mr. Paget served as President and CEO of Core Security Technologies where he successfully turned the company into the market leader in automated penetration testing with over 600 customers in more than 40 countries.

Before leading Core Security, he was senior vice president of operations for Baltimore Technologies Americas where he grew the company to a \$30+ million dollar business. Mr. Paget joined Baltimore Technologies via the acquisition of GTE CyberTrust where he was worldwide vice president of sales and marketing. During his tenure, he established the CyberTrust brand as a market leader in certification authority products and services, growing sales by 100 percent in one year. In 1999, Mr. Paget was named by analyst firm Frost and Sullivan as the "Marketing Turnaround of the Year" and subsequently positioned the company for acquisition by Baltimore Technologies in 2000 for \$150 million.

He also has held a variety of senior sales and marketing positions with IBM and Lotus Development. He holds a Bachelor's degree from Bowdoin College.

About Savant Protection

Savant Protection is the leader in Automated Application Whitelisting. The company's award-winning and patented solution provides total control over all executables on end-user devices eliminating the risks caused by malicious and unauthorized software.

Savant Protection's next generation application whitelisting is the only solution that uses an "implicit" whitelist which stops even the most sophisticated malware attacks without the management overhead or productivity disruption to end users required by today's centralized whitelist signature approaches. Savant Protection's easy-to-deploy and seamless-to-use solution provides the highest levels of endpoint security, compliance and manageability.

Savant Protection's customers include companies in a wide variety of industries, including financial services, aerospace, education, healthcare, retail and government. Savant Protection is privately held and headquartered in Hudson, New Hampshire.
